EXPERIENCE

Full Stack Developer, The Golfers Only - June 2018 to Current

Helped the company restructure their business plan by aiming at a better spot in the Italian golf market by replacing their social network application with a service that allows golfers to book their tee time in any golf club. The MVP consists of a Django Rest Framework API, a front-end ReactJs application and an ElectronJs content management system for golf clubs.

Full Stack Developer , Rocket Fuel - May 2017 to Current

Responsible for full stack development on multiple client projects built with Javascript libraries and frameworks. Among them: React, Angular, Ember, Node, Firebase and the Rocket Fuel proprietary CMS. Refactored the CMS front-end boilerplate and built internal tools to make the development process much faster and easier. One of which is a React ElectronJs app to manage all the company projects. Increased customer satisfaction and retention by optimizing most of the aspects of the applications I worked on. Rebuilt an idea sharing app for medical researchers from the ground up using the MEAN stack.

Full Stack Developer, Fullstack Academy - 2016

Built multiple Javascript based applications in agile teams.

Freelancer - 2010 to 2016

Worked for multiple clients in New York, Seoul, Paris and London. Among the biggest ones is the Italian luxury brand Ferragamo.

PROJECTS

react-ctx-state - A simple react state manager built by leveraging the new React context api. Medium article: https://bit.ly/2L8q3k2 - Npm module: **https://bit.ly/2whwkVs**

All American Tonnage - A ReactJS application for a shipping company (only front-end) - **http://tonnage.militaryshipment.com/**

Hartwell Collaborate - A social network for researchers to exchange and contribute to ideas for medical journals. Built with the MEAN Stack, Elasticsearch for the search engine and deployed using the AWS creative cloud and Jenkins to automate the deployment process - **https://hcollaborate.org/**

Beeswappy - Ember and Firebase application for valuable used object sales - **https://beeswappy.com/**

Other Projects - **http://www.massimo.site**

EDUCATION

State University of Milan, Italy — Digital Communication — 2008

Computer Science applied to media and communication.

SKILLS

Javascript, Python, ReactJs, AngularJs, NodeJs, ElectronJs, Django Rest Framework, AWS, Jenkins, ElasticSearch, Express, Firebase, MongoDb, SQL, HTML/CSS, Sass, Docker, Chai, Jasmine, Mocha.
